Architect Intern - Spring Semester 2027

Architect intern

Dorte Mandrup is an international architecture firm committed to making the built environment more beautiful, human-centered, and sustainable. Working across scale and geography we design from an artistic starting point. We thrive on restoring and transforming historic buildings, designing in sensitive urban and rural landscapes, developing office and educational spaces of the future, and not least shaping cultural and community-focused buildings.

We are driven by a desire to excel, and we take pride in delivering exceptional projects with a sense of place and a unique sense of materiality.

Your day-to-day life at Dorte Mandrup:

As an architect intern you will be part of our open plan studio in the heart of Copenhagen in Vesterbro. You will be part of a vibrant team with strong and wide-ranging professional competences, where you will be encouraged to develop and demonstrate your skills. You will be guided through a structured process, getting an unique insight into how we work. You will be educated to manage the tools you need to work confidently as a professional architect in a creative studio. We trust that you are here because you are exceptionally dedicated to architecture, ambitious and diligent.

What we offer:

Knowledge sharing is an important part our DNA, and to enhance your learning experience we offer a range of internal lectures and software courses. As part of our wider group of interns you are invited to our bi-annual intern study trip, plus many more social activities within the office.
